Core Competencies

PortRail Crane Service, LLC (PCS) specializes in the assembly, installation, and programming of automated container handling equipment and shipyard equipment with a focus on a large-scale port infrastructure projects. Our core services include:

- Crane Inspections & Shipyard Maintenance/Service
- Electrical and Mechanical Crane Integration
- Crane Programming and Commissioning
- Port Infrastructure Project Management
- Technical Staffings and On-Site Supervision
- Heavy Equipment Tooling, Logistics, and Support

PCS delivers turnkey crane service solutions with a strong emphasis on safety, precision, and operational uptime. Additionally, PCS is able to help government contractors meet their requirements for machinery and maintenance.

Differentiators

- **Proven Track Record:** Successfully led the largest crane project in Virginia port history- 88 cranes installed on time and within budget.
- **Specialized Expertise:** Selected by global crane manufacturers for complex automation and integration projects.
- **Workforce Investment:** Created 42 new jobs and invested over \$350K in tools and advanced technology to support large-scale operations.
- **Reliable Partner:** Trusted by the port authorities and crane OEMs as a go-to provider for high-stakes, deadline-driven projects.
- **Safety and Compliance:** Strict adherence to OSHA and port-specific safety protocols.
- **Scalable Solutions:** Ability to rapidly scale teams and operations to meet evolving project demands.

Past Performance

PCS served as General Contractor for the historic \$350 million expansion at Virginia International Gateway and Norfolk International Terminals. Our scope included the assembly, installation, and programming of 88 semi- automated stacker cranes- representing the largest single crane purchase in industry history. This three-year project was completed on time and within budget, earning commendation from port leadership and delivering measurable economic impact across the Commonwealth of Virginia.
